Labour Force Statistics ◆ January 2010

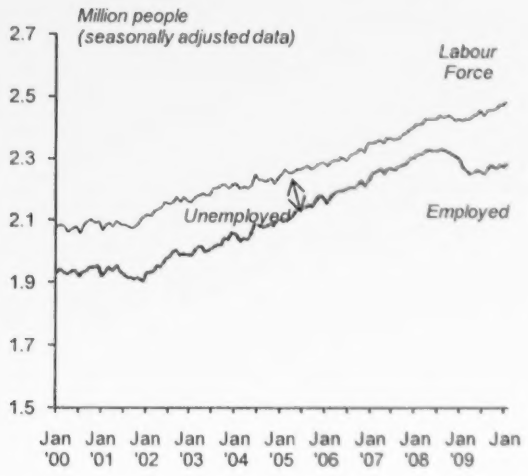
(All labour force statistics are seasonally adjusted, unless otherwise indicated)

January's jobless rate dips to 8.1%

Employment gains in British Columbia (+12,000; +0.5%) outstripped an expansion in the total number of people either working or looking for work (+8,500; +0.3%). This put downward pressure on the province's jobless rate (-0.2 percentage points), which settled at 8.1% in January.

Since July 2009, when the current upswing in employment levels began, British Columbia has seen employment grow by 32,400. However, despite the recent upward trend, BC has 28,200 jobs fewer than it did in October 2008.

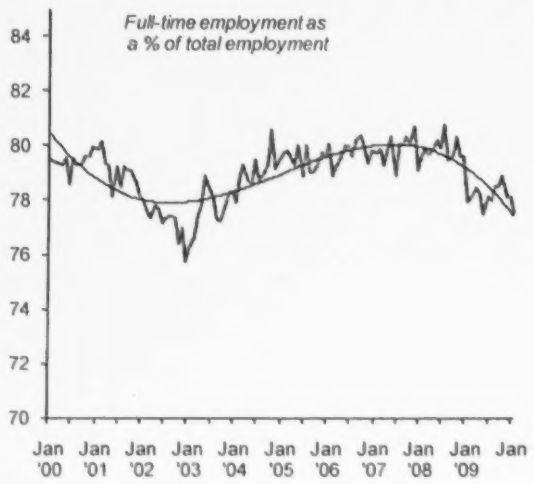
The gap between the size of the labour force and employment narrowed in January



BC Stats

Employment gains made in January were entirely the result of an increase in the number of part-time jobs (+3.3%) as the number of full-time positions fell for the fourth consecutive month (-0.2%). Overall, full-time work's share of total employment has been receding since the middle of 2009.

Relative to the total number of jobs in BC, full-time employment has trended downward of late

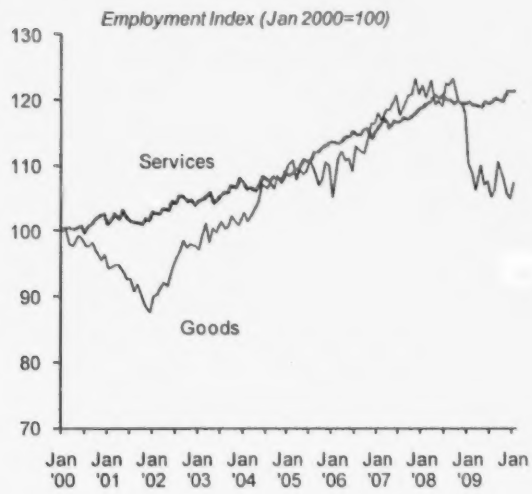


BC Stats

Goods sector employment on the rise while service sector stalls

After a dismal fourth quarter last year consisting of three straight months of significant workforce cutbacks, BC's goods sector began the year on a more positive note as employment rose 2.3% in January. While agriculture (+1.8%) and manufacturing (+0.6%) yielded modest increases, more substantial job creation was seen in construction (+2.5%) and forestry, fishing & mining (+10.9%). Looking back, however, the goods sector has suffered from a long employment drought. To date, the sector has lost roughly 62,300 jobs since July 2008.

Goods sector employment is still down sharply from highs reached in the middle of 2008



BC Stats

The service sector showed only marginal employment growth (+0.1%) in January. Shedding the largest number of jobs was professional, scientific & technical services (-10.1%) followed by public administration (-2.4%) and health care & social assistance (-2.0%). Offsetting these declines were employment increases in trade (+3.8%), finance, insurance & real estate (+2.8%), education (+2.4%) and accommodation & food services (+2.2%).

Regional employment

Jobless rates at the regional level (*3-month moving average, unadjusted*) ranged from a low of 4.9% in Northeast to a high of 12.0% in Cariboo in January. Nearly all regions of the province registered lower employment levels compared to the same month last year with the largest setbacks in North Coast/Nechako (-8.6%) and Cariboo (-8.0%). Only Thompson/Okanagan (+3.2%) and Mainland/Southwest (+0.2%) posted employment gains. The unemployment rate in Vancouver (8.0%) came in just under the provincial rate while Victoria's was significantly lower (6.8%).

Aboriginal population

The jobless rate among BC's adult Aboriginal population (off-reserve, aged 25 to 64) climbed to 6.6% in 2009, an increase of 2.7 percentage points from 3.9% in 2008.

Immigrant population

The labour market outcomes of BC's established immigrants (10+ years) are similar to their Canadian born counterparts. For example, in 2009, the unemployment rate among BC's established immigrants (aged 25 to 54) was 6.4%, identical to their Canadian-born counterparts. In contrast, very recent (5 or fewer years) and recent (5 to 10 years) immigrants (aged 25 to 54) had higher unemployment rates at 11.4% and 7.1% respectively.

The Nation

Total Canadian employment rose 43,000 in January, all in part-time employment pushing the nation's unemployment rate down 0.1 percentage points to 8.3%. Ontario accounted for more than half of employment gains (+0.5%) followed by British Columbia (+0.5%) and Manitoba (+1.4%).

NOTES: 1. *Occupation specific Unemployment Rates include only those unemployed who worked in the past year. The "All Occupations" rate incorporates total unemployed persons which includes an "Occupation Unclassified" category.*

2. *Due to the relatively small sample sizes from which disaggregated data are derived, caution should be used in the interpretation of month-to-month changes in the estimates.*

Labour Force Statistics

This report is based on statistics from the Labour Force Survey produced monthly by Statistics Canada. Questions and comments should be directed to Data Services at (250)387-0327 or write to BC.Stats@gov.bc.ca

Definitions and Explanatory Notes

Reference Week

Monthly estimates of employment, unemployment, and persons not in the labour force refer to the specific week covered by the survey each month, normally the week containing the 15th day.

Labour Force

The labour force is composed of those members of the civilian non-institutional population 15 years of age and over who, during the reference week, were employed or unemployed.

Employed

Employed persons are those who, during the reference week, either: (a) did any work at all, or (b) had a job but were not at work due to own illness or disability, personal or family responsibilities, bad weather, labour dispute, vacation, or other reason not specified above (excluding persons whose job attachment was to a job to start at a definite date in the future).

Unemployment

Unemployed persons are those who, during the reference week, either: (a) were without work, had actively looked for work in the past four weeks (ending with the reference week), and were available for work; or (b) had not actively looked for work in the past four weeks but had been on layoff and were available for work; or (c) had not actively looked for work in the past four weeks but had a new job to start in four weeks or less from the reference week, and were available for work.

Unemployment Rate

The unemployment rate represents the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the number of unemployed in that group expressed as a percentage of the labour force for that group.

Participation Rate

The participation rate represents the labour force expressed as a percentage of the population 15 years of age and over. The participation rate for a particular group (age, sex, marital status, etc.) is the labour force for that group expressed as a percentage of the population for that group.

Employment Rate

The employment rate(employment/population ratio) is the number of employed persons expressed as a percentage of the population 15 years of age and over. The employment rate for a particular group (age, sex, marital status, etc.) is the employment for that group expressed as a percentage of the population for that group.

Rounding

Estimates published by the Labour Force Survey are rounded to the nearest thousand but all derived values (totals, averages, rates, ratios, percent changes etc.) are calculated from unrounded figures. Therefore, the sum of the individual rounded items may not equal the total. Unadjusted estimates rounded to hundreds are available from BC Stats on request.

Seasonal Adjustment

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, holidays, vacation periods, and cycles related to crops, production and retail sales associated with Christmas and Easter. It should be noted that the seasonally adjusted series contain irregular as well as longer-term cyclical fluctuations.
